

UKD Resolution is a purpose built hydrographic survey launch.

Specifically designed to provide a stable working platform for hydrographic surveys UKD Resolution is a highly manoeuvrable and versatile vessel which can deliver detailed survey results to suit a wide range of applications.

Road transportable, she can quickly and easily be deployed to any location in the UK and launched via slipway, hoist or dock crane using her own 3 point lifting system.

Powered by twin Yamaha 40hp Outboard engines UKD Resolution can quickly get between locations to maximise data collection times and being coded to MCA Category 4 can operate up to 20 miles from safe haven weather permitting.

Survey packages are tailored to suit client's requirements and deliver high accuracy cost effective results.
